

Vulnerability & Carbon Monoxide Allowance (VCMA)

Wales & West Utilities Vulnerability & Carbon Monoxide Allowance (VCMA)

Project Eligibility Assessment (PEA)

WHAM (Warm Homes Advice and Money)

Centre for Sustainable Energy (CSE)

Tom Robinson Tom.Robinson@wwutilities.co.uk

January 2024

Project Eligibility/ Registration Criteria

In order to qualify as a VCMA Project, a project must:

- a) have a positive, or a forecasted positive, Social Return on Investment (SROI) including for the gas consumers funding the VCMA Project;
- b) either:
 - i. provide support to consumers in Vulnerable Situations and relate to energy safeguarding, or
 - ii. provide awareness of the dangers of CO, or
 - iii. reduce the risk of harm caused by CO;
- c) have defined outcomes and the associated actions to achieve these;
- d) go beyond activities that are funded through other price control mechanism(s) or required through licence obligations; and
- e) not be delivered through other external funding sources directly accessed by a GDN, including through other government (national, devolved or local) funding.¹

Eligibility criteria for company specific essential gas appliance servicing, repair, and replacement

In order to qualify as a VCMA Project, unsafe pipework and essential gas appliance² servicing, repair or replacement must meet the following criteria:

- a) a GDN has to isolate and condemn unsafe pipework or an an essential gas appliance following a supply interruption or as part of its emergency service role;
- b) the household cannot afford to service, repair or replace unsafe pipework or the essential gas appliance; and
- c) sufficient funding is not available from other sources (including national, devolved or local government funding) to fund the unsafe pipework or the essential gas appliance servicing, repair or replacement.

² Essential gas appliances are gas fuelled heating systems (including gas boilers and gas fires), and gas cookers.

NAI ES&WEST

¹ If part, but not full, funding is available through an external funding source for an eligible project, VCMA funding can be used for the remaining amount.

WALES&WEST Project Eligibility/ Registration Criteria

Information required for the registration of VCMA projects

Information required	Description
Project title	WHAM (Warm Homes Advice and Money)
Funding GDN(s)	Wales & West Utilities
New/ Updates PEA	New
VCMA Project contact name, email and number	Tom Robinson –
	tom.robinson@wwutilities.co.uk –
	07890 315438
Total VCMA funding required (£k)	£997,900
Problem(s)	 WHAM was originally set up in 2016, covering Bristol and North Somerset, to support people in some of Bristol's most deprived areas with more than just one-off energy advice. Centre for Sustainable Energy (CSE) has built up a partnership with six local organisations providing support and advice to vulnerable people that tackle all the underlying issues of fuel poverty. WHAM partners report rising demand for their
	services, as well as clients presenting with complex needs, who are often in greater crisis, with high levels of mental health issues and eviction notices. There is more scope to work with the health service. Safeguarding referrals (i.e. no heat situations) have risen and benefit applications are going to appeal as a matter of course. WHAM has a current list of 250 households (needing in-depth and ongoing support following an initial triaging call); demand is likely to increase for the next two years. Demand is so high that our debt agency partners are closed for referrals (other than WHAM clients) due to high demand.
	Thanks to existing funding from WWU (centre- for-sustainable-energy.pdf (wwutilities.co.uk)), CSE has built up a network of organisations in Bath and North East Somerset (B&NES) who are seeking a more integrated partnership service and much greater capacity to deal with all of the underlying causes of fuel poverty. With an estimated 9,900 households in fuel poverty (12%), people in B&NES also need substantially more in-depth support than the current single caseworker can provide.

WALES&WEST Project Eligibility/ Registration

CITCIIA	
	There is an ongoing need to address the systemic issues that contribute to fuel poverty to protect people with, or at risk of, health issues from living in a cold home. These include Chronic Respiratory Disease (including COPD), cardiovascular diseases (CVD), and mental illness in deprived populations in the WHAM area (within the most deprived 20% of the national population, IMD). CVDs are the second most common cause of early death among Bristol residents, which despite seeing a decline during this century, have levelled off in Bristol over recent years. Since lockdown, CSE's work in the discharge units of three local hospitals was reduced, but we are inundated with requests for CSE to help ensure patients do not return to a cold home.
	our whole area. We estimate a further 20% increase in demand from this winter. For WWU this means Bristol, North Somerset, B&NES, Somerset, Swindon and Wiltshire (the part within WWU).
Scope and Objectives	CSE intend to deliver advice and support to 6,000 vulnerable households (c. 18,000 people) over two years from the westernmost tip of Somerset to Wiltshire and Swindon in the east, and all points in-between. It also builds community capacity through the support and development of volunteers which leaves a legacy of knowledge of skills far beyond the project.
	It is also significantly ambitious in the depth and impact of the support for each of those households, in that it will tackle all the causes of fuel poverty, particularly income (including a target of £450 average financial benefit per client), housing, behaviour and energy understanding confidence, and bringing together a unique style of partnership where caseworkers work within other organisations. On completion of the aforementioned Heat Ability project, in Bristol and North East Somerset, funded by WWU, WHAM will supersede this and continue to service these communities.

CIII	ena
	WHAM has the following objectives:
	1. To work together with vulnerable
	people to improve their financial skills
	and understanding, ensuring they are
	more confident and resilient around
	future changes in fuel prices and
	income.
	2. Make homes warmer, with less damp
	and mould, particularly those with
	health conditions associated with living
	in cold and damp conditions.
	3. Support an integrated partnership; an
	easy system for housing, social care,
	health and voluntary sector workers to
	refer clients to, with confidence that
	referrals are acted upon and result in
	positive outcomes.
	4. Invest in local community capacity,
	particularly in the health care sector, to
	identify, refer clients with health
	conditions exacerbated by living in cold
	homes, so they can better deal with
	fuel poverty.
	In addition, funding will support CSE's advice
	team across its whole area to achieve the
	following objectives:
	• Increase CSE's capacity to support more
	vulnerable households with energy advice,
	because of advisors having more time, ensuring
	CSE can meet the expected significant demand.
	Target outreach on engaging
	households in rural and hard-to-reach areas of
	Somerset, Wiltshire, North Somerset and
	B&NES.
	Reduce the financial hardship and
	stress of vulnerable households during and in
	the aftermath of the current crisis through
	more benefits advice capacity.
	Increase vulnerable household's
	confidence and understanding around bills,
	energy use and controls.
	Ensure all relevant clients are
	supported to get registered on the Priority
	Services Register.
	Increase the confidence and support
	from all those who refer their clients to CSE
	that they can continue to make referrals with
	assurance that they are acted upon and result
	in positive outcomes.

Project Eligibility/ Registration

	ena
	 Improve the long-term capacity of CSE and the local communities we serve, by recruiting, training and supporting volunteers to handle some of the advice and casework. Ensure, where relevant, all clients
	supported receive advice and support around carbon monoxide, to post or provide detectors
	as part of a visit and to refer on to gas safe where there might be an issue.
Outcomes, associated actions, and success criteria	The benefits of the projects can be summarised as: 6,000 households will receive in-depth advice, specifically:
	 Low household incomes Average income gained for clients is £450 (from direct funding/grants, debt write off, energy efficiency measures, cheaper energy tariffs, behavioural changes). 2,500 beneficiaries will receive budgeting advice to reduce their energy debt and make their finances more resilient. 3,000 beneficiaries will receive an income maximisation check which will ensure they are accessing all entitlements.
	The cost of fuel Ensuring up to 1,000 households benefit from lower fuel bills, including accessing up to £296 in fuel vouchers (for prepayment meter customers), specific area-based funding for credit meter customers, or (if and when applicable) supporting clients to obtain cheaper tariffs.
	 People's behaviours and understanding of energy use 4,700 will report increased knowledge and confidence of how to monitor, check and pay fuel bills and manage their energy use more effectively. 4,700 will report that they feel more confident & better able to keep their homes safe and warm.
	 Energy Efficiency of the home 4,700 will improve their physical & psychological wellbeing through living in warmer homes and being less anxious about their energy and/or their finances. All eligible clients will be referred to a retrofit scheme/project/installer for new

•	
	energy efficiency measures (insulation and heating).
	Additional benefits
	2,000 low-income households across
	our area will be more knowledgeable about the
	risks of carbon monoxide.
	All eligible clients will be placed on the
	Priority Service Register (PSR), those not
	already registered, as a result of our support.
	Organisations becoming more knowledgeable
	on fuel poverty
	 Following support, 50 local
	health/social care practitioners will report that
	they are more knowledgeable about fuel
	poverty, better able to support clients or refer
	them to WHAM for in-depth support.
	• 500 referrals generated from primary
	care, hospital or other local health services.
	A strong partnership of organisations
	 1,000 beneficiaries will receive, in
	addition to energy advice, support from
	another specialist partner around finances,
	debt, repair, or housing.
	• 300 beneficiaries in B&NES will have
	access to additional Care & Repair, Debt advice
	and housing advice from a partner
	organisation.
	To maintain a focus on progress toward the
	outcomes listed above, WWU and CSE will form
	a steering group, meeting quarterly discuss and
	identify ongoing risks and mitigations. WWU
	would expect to see approx 12% of each
	target achieved each quarter, for example 300
	of the 2,500 beneficiaries to receive budgeting
	advice etc In addition, WWU will request case
	studies and client testimonials to further
	demonstrate the success of the initiative,
	throughout the project term.
Project Partners and third parties involved	This project is being funded by Wales & West
	Utilities and delivered by our principal partner
	Centre for Sustainable Energy. CSE will work alongside various agencies across
	their footprint, including:
	Local Citizens Advice Bureau's
	WE Care Home Improvements
	North Bristol Advice Centre
	AMS Electrical

WALES&WEST Project Eligibility/ Registration

	 North Somerset Council Bristol City Council Southmead, Weston, Royal United Hospital Various GP Surgeries
Potential for new learning	This project has the potential to provide insight into the levels of support required in what can be considered prosperous areas. We may also be able to understand the quality of the service provided by organisations such as CSE, and what skills and techniques can be adapted and applied to business-as- usual activities at Wales & West Utilities. In addition to this, we can also look to engage further with the target group of this project, to understand how our general work impacts their livelihoods.
Scale of VCMA Project and SROI calculations, including NPV	We have taken the forecasted numbers expected by C&RC for the two-year delivery period and calculated the following SROI over a 5-year period: Total Gross Present Value = £11,486,243 Net Present Value = £10,508,178 SROI per £1 spent = £10.
VCMA Project start and end date	This project will begin in January 2024 and end in January 2026.
Geographical area	Bristol, B&NES and North Somerset local authority areas for WHAM. As well as outreach, volunteer support and casework in Somerset, Swindon and Wiltshire (those parts within WWU area).
