

Job Title	Net Zero Project Manager – Industrial Clusters
Department	Net Zero & Sustainability
Reports to	Net Zero Portfolio Manager – Industrial Clusters
Grade	Grade 5
Purpose & Overview	To support in the delivery of the Net Zero strategy within WWU. The role will progress and lead emerging industrial decarbonisation projects, providing support to the Net Zero Portfolio Manager and in turn the Head of Net Zero and Sustainability. This will require strategic project development from conceptual stages through to delivery, by building on existing work and designing future work. It will also require attendance at external forums, close liaison with multiple stakeholders, the production of timely updates, internal and external communication, and project management of technical and commercial aspects of various projects.
Key Accountabilities	• Managing and delivering industrial decarbonisation work packages within projects and various areas of the Net Zero Innovation Portfolio. • Developing and submitting applications to funding streams from Department for Energy Security and Net Zero (DESNZ), Welsh Government and other public sector mechanisms. • Engage and manage key partners within existing industrial clusters such as the North East Wales Industrial Decarbonisation (NEWID) Cluster to deliver WWU's strategic aims. • Support the Net Zero Portfolio Manager – Industrial Clusters to influence and progress the development of network infrastructure for WWU's industrial customers across North Wales. • Identify future opportunities and routes to project development through use of funding streams such as the Network Innovation Allowance (NIA) and Strategic Innovation Fund (SIF). • Attend workshops and represent WWU in external forums and with key organisations such as DESNZ, and Net Zero Industry Wales. • Report project progress and disseminate key project findings both internally and externally, and as part of our own industry working groups.

	• Develop and deliver internal interfaces with teams and functions across WWU. • Consider commercial and intellectual property opportunities.
Technical Know-How & Skills	• Project Management experience essential • Either Mechanical or Energy engineering, or Commercial experience is essential • Ability to think strategically, support analysis and work across a number of future scenarios • Experience of liaising with multiple stakeholders and representing an organisation externally • Takes pride in their work and are motivated to consistently deliver high-quality outputs • A strong team player with excellent listening, communication, and presentation skills • Experience of working with government departments and/or with North Wales local authorities desirable
Qualifications	• Full clean UK driving licence desirable • Project management qualifications (e.g. APM or PRINCE2) desirable
